

UAA Sacramento NSBE Jr Chapter Activities

UAA Sacramento NSBE Jr Chapter offers an exciting opportunity for students to explore the STEM fields, and to assist students in completing the A-G curriculum.

Our goal is to expose students to various STEM disciplines and provide them with educational, mentoring and networking opportunities that might lead to higher education and or career pathways into the STEM professions.

The applied activities and research projects relate to strengthening one's understanding of science (physics, chemistry, etc.) and mathematics.

UAA Sacramento NSBE Jr Student participants formed a robotics team, called the “RoboRays” and completed the underwater robot build project to compete in the Port City SeaPerch competition.
